ACADEMIC DIRECTION

Dr. Patricio Barros

SPECIALIST IN

- ◆ Surgery
- ◆ Dermatology
- ◆ Master in Laser Surgery
- ◆ Minimally invasive surgery

Endolifting

For skin rejuvenation and minimally invasive facial remodeling.

WHAT IT ACHIEVES

- Stimulates the deep and superficial layers of the skin.
- Tightens and retracts connective tissue.
- Activates collagen generation.
- Eliminates localized fat.

85% SATISFACTION

According to the latest studies.

COMFORTABLE FOR THE PATIENT

Minimal to no downtime, painless and with no recovery time required.

WHAT IT REQUIRES

Micro optical fibers (available in different thicknesses depending on the area to be treated) that are easily inserted into the skin down to the superficial hypodermis, with no incisions and no anesthesia.

Four areas, one **approach**.

01

Facial contouring

02

Neck rejuvenation

03

Jawline definition

04

Submental area
treatment (double chin)
