Dermatologist

Facial Plastic Surgery

CREDENTIALS

- Patented UltraLift protocol
- Author, book chapter in AMOLCA
- Miami Aesthetic Awards
- Ultrasound research in regenerative medicine
- Official LIPOCUBE™ speaker
- EAFPS member · SECPF certified

Academic **syllabus.**

01 Principles of regenerative medicine and its role in current aesthetics.

02 Advantages of autologous grafts over synthetic grafts.

03 Advanced facial anatomy and a comprehensive understanding of facial aging.

04 Restructuring of facial volumes with a multilayer technique using LipoCube.

05 Understanding fat grafting: millifat, microfat and nanofat.

06 Extraction of stem cells, exosomes and growth factors from autologous tissue.

07 Bioface Clinic exclusive protocols for regenerative facial rejuvenation.

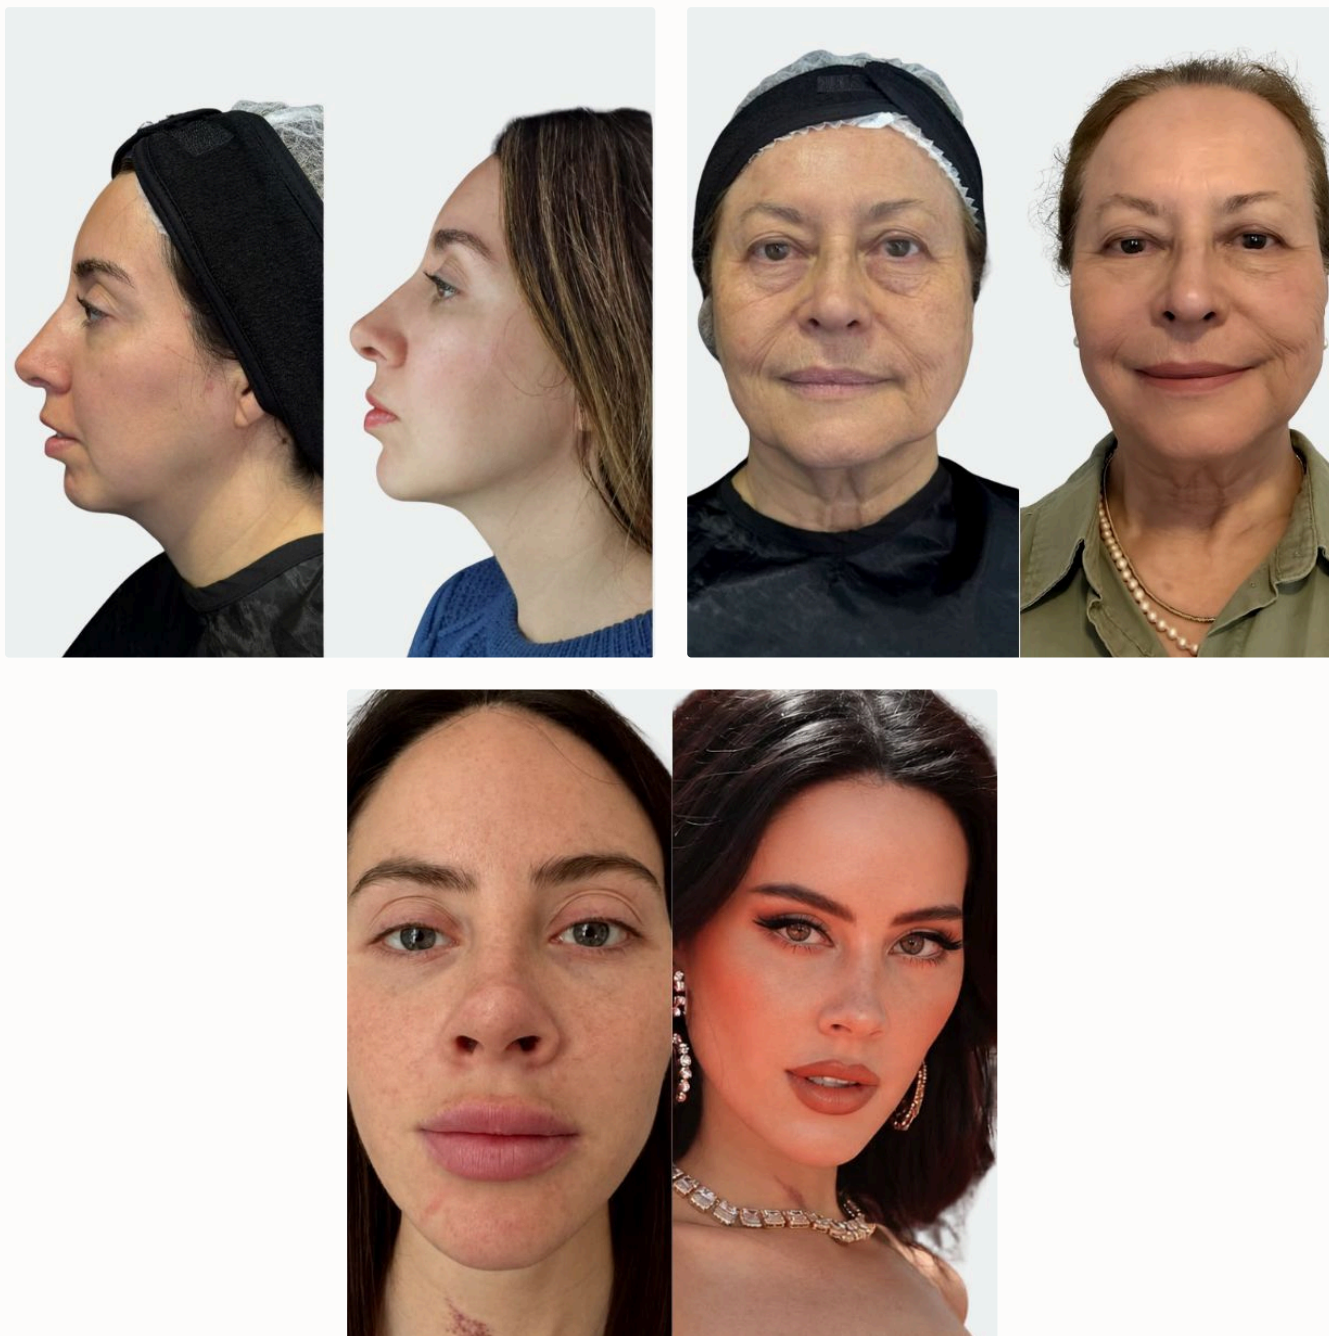

Live clinical practice.

Participants will work with **2 live patients**, analyzing different facial biotypes, degrees of laxity and different therapeutic strategies through the exclusive protocol developed by Bioface Clinic.

Volumetric and **regenerative** rejuvenation.

Before and after facial fat transfer with LipoCube technology: volume restoration, improved skin quality and harmonization of the facial contour.

Results vary depending on the patient and the clinical indication.

Opportunity and return on investment.

ESTIMATED PROCEDURE VALUE

USD 1,000 — USD 3,000

USD per patient

This elite training delivers clinical tools and high-demand protocols that allow a **rapid return on investment (ROI)**, becoming an excellent opportunity for professional expansion and positioning within the advanced regenerative aesthetic medicine market.

The course **includes.**
